

Part 4 Local government infrastructure plan

4.1 Preliminary

- (1) This local government infrastructure plan has been prepared in accordance with the requirements of the [Sustainable Planning Act 2009](#).
- (2) The purpose of the local government infrastructure plan is to:
 - (a) integrate infrastructure planning with the land use planning identified in the planning scheme;
 - (b) provide transparency regarding a local government's intentions for the provision of trunk infrastructure;
 - (c) enable a local government to estimate the cost of infrastructure provision to assist its long term financial planning;
 - (d) ensure that trunk infrastructure is planned and provided in an efficient and orderly manner; and
 - (e) provide a basis for the imposition of conditions about infrastructure on development approvals.
- (3) The local government infrastructure plan:
 - (a) states in Section 4.2 (planning assumptions) the assumptions about future growth and urban development including the assumptions of demand for each trunk infrastructure network;
 - (b) identifies in Section 4.3 (priority infrastructure area) the prioritised area to accommodate urban growth up to 2026;
 - (c) states in Section 4.4 (desired standards of service) for each trunk infrastructure network the desired standard of performance;
 - (d) identifies in Section 4.5 (plans for trunk infrastructure) the existing and future trunk infrastructure for the following networks:
 - (i) water supply;
 - (ii) sewerage;
 - (iii) roads;
 - (iv) footpaths and cycleways; and
 - (v) parks and land for community facilities.
 - (e) provides a list of supporting documents that assist in the interpretation of the local government infrastructure plan in the Editor's note – Extrinsic material at the end of Section 4.5.2.

4.2 Planning assumptions

- (1) The planning assumptions state the assumptions about:
 - (a) population and employment growth; and
 - (b) the type, scale, location and timing of development including the demand for each trunk infrastructure network.
- (2) The planning assumptions together with the desired standards of service form a basis for the planning of the trunk infrastructure networks and the determination of the priority infrastructure area.
- (3) The planning assumptions have been prepared for:
 - (a) the base date 2011 and the following projection years to accord with future Australian Bureau of Statistics census years:
 - (i) mid 2016;
 - (ii) mid 2021;
 - (iii) mid 2026;
 - (iv) mid 2031; and
 - (v) ultimate
 - (b) the LGIP development types in column 2 that include the uses in column 3 of Table 4.2.1.
 - (c) the projection areas identified on Growth Model Zone Maps 1 to 5 in the extrinsic material (Local Government Infrastructure Plan - planning assumptions & PIA). For reporting purposes, the projections are summarised by the reporting areas identified in Schedule 3 - Local government infrastructure plan mapping and tables, SC3.3.1 - Reporting areas map.

Table 4.2.1-Relationship between LGIP development categories, development types and uses

Column 1 LGIP development category	Column 2 LGIP development type	Column 3 Uses
Residential development	Single Dwelling (urban)	Dwelling house (urban)
	Single Dwelling (rural residential)	Dwelling house (rural residential)
	Single Dwelling (rural)	Dwelling house (rural)
	Multiple Dwelling	Dual occupancy Multiple dwelling
	Other Dwelling	Caretaker's accommodation Community residence Dwelling unit Relocatable home park Residential care facility Retirement facility
Non-residential development	Retail	Adult store Agricultural supplies store Bar Bulk landscape supplies Food and drink outlet Function facility Garden centre Hardware and trade supplies Market Outdoor sales Roadside stall Service station Shop Shopping centre Showroom Wholesale nursery

Column 1 LGIP development category	Column 2 LGIP development type	Column 3 Uses
	Services	Animal keeping Brothel Car wash Cemetery Childcare centre Club Community care centre Community use Crematorium Detention facility Educational establishment Environmental facility Funeral parlour Health care services Home based business Hospital Hotel Indoor sport and recreation Major sport, recreation and entertainment facility Motor sport facility Nature-based tourism Nightclub entertainment facility Non-resident workforce accommodation Outdoor sport and recreation Outstation Park Place of worship Resort complex Rooming accommodation Rural workers accommodation Service industry Short-term accommodation Theatre Tourist attraction Tourist park
	Professional	Emergency services Office Sales office Veterinary services
	Industry	Air services High impact industry Landing Low impact industry Marine industry Medium impact industry Parking station Port services Research and technology industry Rural industry Special industry Telecommunications facility Transport depot Warehouse Winery

Column 1 LGIP development category	Column 2 LGIP development type	Column 3 Uses
	Other	Animal husbandry Aquaculture Cropping Extractive industry Intensive animal husbandry Intensive horticulture Major electricity infrastructure Permanent plantation Renewable energy facility Substation Utility installation

(4) Details of the methodology used to prepare the planning assumptions are stated in the extrinsic material.

4.2.1 Population and employment growth

(1) A summary of the assumptions about population and employment growth for the planning scheme area is stated in Table 4.2.1.1-Population and employment assumptions summary.

Table 4.2.1.1-Population and employment assumptions summary

Column 1 Description	Column 2 Assumptions				
	2016	2021	2026	2031	Ultimate
Population	192,115	201,770	217,089	237,382	404,346
Employment	93,137	97,412	104,489	115,525	418,035

(2) Detailed assumptions about growth for each projection area and LGIP development type category are identified in the following tables in Schedule 3 Local government infrastructure plan mapping and tables:

- (a) Table SC3.1.1 - Existing and projected population, and;
- (b) Table SC3.1.2 - Existing and projected employment;

Editor's note—More detailed projections by growth model zone areas are available in the extrinsic material.

4.2.2 Development

(1) The developable area is identified in Schedule 3-Local government infrastructure plan mapping and tables, SC3.3.2 - Developable area map.

(2) The planned density for future development is stated in Table 4.2.2.1 to Table 4.2.2.5.

Editor's note—Locations where infill and broad-hectare densities apply are identified respectively as 'less than threshold' and 'greater than threshold' areas that are mapped in Appendix C and Appendix D of *Local government infrastructure plan - planning assumptions & PIA . Townsville City Council. (extrinsic material)*. The densities and other key assumptions in this local government infrastructure plan include:

- Assumed population, housing and employment densities (infill) (Table 4.2.2.1);
- Assumed population, housing and employment densities (broad-hectare) (Table 4.2.2.2);
- Assumed population, housing and employment densities (heritage)(Table 4.2.2.3);
- Assumed population, housing and employment densities (special cases) as shown in Figure 4.2.2.1 (Table 4.2.2.4); and
- Delayed start dates for growth associated with preliminary approvals (Table 4.2.2.5).

(3) A summary of the assumptions about future residential and non-residential development for the planning scheme area is stated in Table 4.2.2.6 - Residential dwelling and non-residential floor space assumption summary.

(4) A summary of the assumptions about future educational enrolments for the planning scheme area is stated in Table 4.2.2.7 - Education assumptions summary.

	Total	3,403,968	3,564,135	3,837,844	4,242,222	15,908,516

Table 4.2.2.7-Education assumptions summary

Column 1 Description		Column 2 - Assumptions					
		2011	2016	2021	2026	2031	Ultimate
Education enrolments	Pre-primary	18,730	19,615	20,807	21,926	18,730	25,662
	Secondary	12,904	13,514	14,335	15,200	12,904	17,948
	Tertiary	<u>14,574</u>	<u>15,292</u>	<u>16,484</u>	<u>17,950</u>	<u>14,574</u>	<u>19,269</u>
	Total	46,208	48,421	51,627	55,076	46,208	62,879

Editor's note—Student enrolments are also a critical aspect of infrastructure planning, so their assumptions and projections have been made in addition, and supplementary to, the statutory requirements of the LGIP.

- (5) Detailed assumptions about future development for each projection area and LGIP development type are identified in the following tables in Schedule 3 - Local government infrastructure plan mapping and tables:
- (a) Table SC3.1.3 - Existing and projected residential dwellings;
 - (b) Table SC3.1.4 - Existing and projected non-residential floor space; and
 - (c) Table SC3.1.5 - Existing and projected education enrolments.

Editor's note—More detailed projections by growth model zone areas are available in the extrinsic material. Projections are based on the Townsville Growth Model (18.5.2016), moderated to provide for an earlier start for Rocky Springs, and a later start for Mt Low Developments.

4.2.3 Infrastructure demand

- (1) The demand generation rate for a trunk infrastructure network is stated in Column 4 of Table SC3.1.6a and Table SC3.1.6b, Schedule 3, Local government infrastructure plan mapping and tables.
- These rates are for land which is, respectively, less than or greater than thresholds of size that represent infill or broad-hectare development that correlate with the development assumptions in section 4.2.2.
- (2) The service catchments are identified in Schedule 3 Local government infrastructure plan mapping and tables, SC3.3.3 – Service area maps. They are also shown in finer detail in the plans for trunk infrastructure¹.
- (3) A summary of the projected infrastructure demand for each service catchment is stated in Table 4.2.3.1 to Table 4.2.3.5.

¹ This is different to the LGIP template. Reference to the service catchment maps are made here rather than from the tables.

Table 4.2.3.1 - Water supply demand summary

4.3 Priority infrastructure area

- (1) The priority infrastructure area identifies the area prioritised for the provision of trunk infrastructure to service the existing and assumed future urban development up to 2031.
- (2) The priority infrastructure area is identified in Schedule 3 - Local government infrastructure plan mapping and tables, SC3.3.4 - Priority infrastructure area map.

4.4 Desired standards of service

- (1) This section states the key standards of performance for a trunk infrastructure network.
- (2) Details of the standard of service for a trunk infrastructure networks are identified in the extrinsic material.

4.4.1 Water supply network

The water supply desired standards of service is to:

- (1) Ensure drinking water complies with the [National Health and Medical Research Council \(NHMRC\) Australian drinking water guidelines](#) for colour, turbidity and microbiology.
- (2) Collect, store, treat and convey potable water from source to consumers in accordance with the [Water Act 2000](#).
- (3) Minimise non-revenue water loss.
- (4) Design the water supply network in accordance with council's adopted standards identified in the planning scheme to provide:
 - (a) average day consumption (AD) – 600 l/EP/day;
 - (b) minimum and maximum supply pressure of 220 kPa and 800 kPa at each property boundary; and
 - (c) fire flow for residential (15 l/s for 2 hours), industrial and commercial (30 l/s for 4 hours) development.
- (5) Ensure water systems meet the requirements of the [Water Supply \(Safety and Reliability\) Act 2008](#).

4.4.2 Sewerage network

The sewerage desired standards of service is to:

- (1) Provide a reliable network that collects, stores, transports, treats and releases sewerage from premises.
- (2) Design the sewerage network in accordance with:
 - (a) council's adopted standards identified in the planning scheme;
 - (b) Water Services Association of Australia (WSAA) guidelines;
 - (c) the [Water Act 2000](#);
 - (d) the requirements of the [Water Supply \(Safety and Reliability\) Act 2008](#);
 - (e) all Environment Protection (EPA) legislation, regulations and licence conditions; and
 - (f) key design parameters identified in Table 4.4.2.1.

Table 4.4.2.1 - Key design parameters for the sewerage network

Infrastructure item	Design parameters
All (network)	average dry weather flow (ADWF) - 230 l/EP/day peak wet weather flow (PWWF) - 5 x ADWF or C1 x ADWF (whichever is larger). C1 = $15 \times (EP)^{-0.1587}$
Pump stations	emergency storage of 6 hrs @ ADWF in pump stations and contributing gravity sewer catchments. installed large pump capacity - PWWF installed small pump capacity - 2 x ADWF
Gravity sewers	air space of at least 30% of pipe diameter at design flow slope to achieve self-cleansing velocity
Rising mains	minimum velocity for small pump: 0.5 m/s minimum velocity for large pump: 0.75 m/s maximum velocity: 2.5 m/s
Sewerage treatment/release	existing and future DEHP licence conditions, Recycled Water Management Plan requirements, EPBC requirements, biosolids guidelines and other relevant state and federal government guidelines and legislation.

The above table provides a summary of a few of the key design parameters for the sewerage network. Reference should be made to the full council planning and design standards in the relevant planning scheme code and policy along with

other nominated standards, guidelines and legalisation for the planning and design of sewerage networks.

4.4.3 Roads network

The roads desired standards of service is to:

- (1) Provide a functional, safe and efficient road hierarchy that supports settlement patterns, commercial and economic activities, and freight movement.
- (2) Design the road network to comply with the following:
 - (a) adopted standards identified in the planning scheme, and where deficient: the [Department of Transport and Main Roads' Interim Guide to Road Planning and Design](#) or the [AUSTROADS guides](#);
 - (b) maximum road volume to capacity ratios (Table 4.4.3.1); and
 - (c) maximum degree of saturation for intersections (Table 4.4.3.2).

Table 4.4.3.1 - Maximum volume to capacity ratios for the road network

Infrastructure item	Maximum volume to capacity ratio by land use	
	Residential	Non-residential
Arterial	0.75	0.75
Sub-arterial	0.75	0.75
Major collector	0.75	0.75
Arterial (state-controlled)	0.75	0.75

Table 4.4.3.2 - Maximum degree of saturation for road intersections

Road network item	Maximum degree of saturation
Traffic signals	0.8
Roundabout	0.8
Priority controlled	0.8
Traffic signals (state-controlled)	0.8

4.4.4 Footpaths and cycleways network

The footpaths and cycleways desired standards of service is to:

- (1) Provide a safe, attractive and convenient network that links residential areas to major activity nodes and public transport interchanges, thereby encouraging walking and cycling as acceptable travel alternatives; and
- (2) Comply with council's adopted standards identified in the planning scheme, and Table 4.4.4.1.

Table 4.4.4.1 - Key footpath and cycleway design characteristics

Characteristic	Description
Coherence	Continuity of routes, consistent quality of routes and facilities, easy to follow, freedom of choice of routes.
Directness	Efficient operating speed, minimal delay times on commuting routes, avoid detour effects.
Safety	Minimal risk of accidents, conflict with motorised traffic or exposure to unsafe infrastructure.
Attractiveness	Lighting, personal safety, aesthetics, integration with surrounding area, access to different activities.
Comfort	Smooth, skid resistant surfaces, gentle gradients, minimal obstructions, minimal need to stop, minimal complicated movements, protection from adverse weather, journey facilities (e.g. seats, shade, drinking fountains).

4.4.5 Public parks and land for community facilities network

The parks and land for community facilities DSS is to:

- (1) Provide an accessible network of parks, open space, and opportunities for co-located community facilities that meets the needs of residents and visitors in accordance with the rate of provision identified in Table 4.4.5.1 and accessibility standards outlined in Table 4.4.5.2.

- (2) Ensure land for public parks and community facilities has:
- (a) minimum land size as identified in Table 4.4.5.3;
 - (b) configuration, slope, and acceptable level of flood immunity in accordance with adopted standards identified in Table 4.4.5.3; and
 - (c) embellish public parks to complement the type and purpose of the public park as identified in Table 4.4.5.4.

Table 4.4.5.1 - Park provision

Infrastructure	Rate of provision (m ² /ERP)	
	District	Regional
Recreation parks	4	6
Sports parks	12	5

Table 4.4.5.2 - Park access

Infrastructure	Accessibility standard (km)	
	District	Regional
Recreation parks	2	25
Sports parks	5	10

Table 4.4.5.3 - Land characteristics

Infrastructure	Recreation parks		Sports parks	
	District	Regional	District	Regional
Minimum usable size (ha)	2	6	3	10
Average (desired) size (ha)	4	13	6	18
Shape of land	Preferred square or rectangular aspect ratio no greater than 2:1		To maximise area available for playing fields, a square or rectangle is most efficient	
Minimum desired flood immunity	20% of total area to be above Q50, 10% to be above Q100	50% of total area to be above Q50, 20% to be above Q100	Free of hazards. Fields and courts above Q50. Built facilities above Q100	
Maximum desired grade	Average grade of 1:14 for 50% of site		1:80 for all playing surfaces. Laser levelling to a maximum gradient of 1:100	
Road frontage and visibility	50% of park perimeter to have direct road frontage, preferably on a collector road		Approximately 25-50% of the park perimeter to have direct road frontage	

Table 4.4.5.4 - Standard facilities/embellishments for trunk public parks

Embellishment type	Recreation parks		Sport parks	
	District	Regional	District	Regional
Playground	✓	✓		
Half-basketball court	✓	✓		
Re-bound wall	✓	✓		
Skate facility	✓	✓		
Exercise equipment	✓	✓		
Fencing – bollards or log and rail to prohibit car access	✓	✓	✓	✓
Shade trees clustered near activity areas	✓	✓	✓	✓
Turf	✓	✓	✓	✓
Landscaped garden beds	✓	✓	✓	✓
Irrigation	✓	✓	✓	✓
Lighting	✓	✓	✓	✓
Internal pathways and paving	✓	✓	✓	✓
Bicycle racks	✓	✓	✓	✓
Signage	✓	✓	✓	✓
Shade structures	✓	✓	✓	✓
Tap/bubbler	✓	✓	✓	✓
Bench seating	✓	✓	✓	✓
Electric barbeque	✓	✓		
Picnic shelters	✓	✓	✓	✓
Bins	✓	✓	✓	✓
Dog off-leash areas	✓	✓		
Toilets	✓	✓	✓	✓
Internal roads and car parking		✓	✓	✓
Clubhouse			✓	✓
Spectator facilities			✓	✓
Sports fields			✓	✓
Sports courts			✓	✓

4.5 Plans for trunk infrastructure

- (1) The plans for trunk infrastructure identify the trunk infrastructure networks intended to service the existing and assumed future urban development at the desired standard of service up to 2031.

4.5.1 Plans for trunk infrastructure maps

- (1) The existing and future trunk infrastructure networks are shown on the following maps in Schedule 3-Local government infrastructure plan mapping and tables:
- (a) SC3.3.5 - Plans for trunk water supply infrastructure;
 - (b) SC3.3.6 - Plans for trunk sewerage infrastructure;
 - (c) SC3.3.7 - Plans for trunk roads infrastructure;
 - (d) SC3.3.8 - Plan for trunk footpaths and cycleways infrastructure;
 - (e) SC3.3.9 - Plan for trunk parks and land for community facilities infrastructure.
- (2) The State infrastructure forming part of transport trunk infrastructure network has been identified using information provided by the relevant State infrastructure supplier.

4.5.2 Schedules of works

- (1) Details of the existing and future trunk infrastructure networks are identified in the electronic Excel schedule of works model which can be viewed here: ([Click here](#)).
- (2) The future trunk infrastructure is identified in the following tables in Schedule 3-Local government infrastructure plan mapping and tables:
- (a) for the water supply network, Table SC3.3.5.1
 - (b) for the sewerage network, Table SC3.3.6.1
 - (c) for the road network, Table SC3.3.7.1
 - (d) for the footpath and cycleway network, Table SC3.3.8.1
 - (e) for the parks and land for community facilities network, Table SC3.3.9.1

Editor's note—Extrinsic material

The below table identifies the documents that assist in the interpretation of the local government infrastructure plan and are extrinsic material under the *Statutory Instruments Act 1992*.

List of extrinsic material

Column 1 Title of document	Column 2 Date	Column 3 Author
Local government infrastructure plan - Interim Amendment 2019 - Explanatory Note	15.11.19	D. Irwin
Local government infrastructure plan - 2019 SOW model EXCEL spreadsheet. Townsville City Council	15.11.19	D. Irwin
LGIP projections and densities 2019. EXCEL spreadsheet. Townsville City Council	27.9.19	D. Irwin
Local government infrastructure plan – planning assumptions & PIA. Townsville City Council. (Superseded LGIP)	11.4.17	D. Irwin
Local government infrastructure plan – DSS, definitions and demand. Townsville City Council. (Superseded LGIP)	11.4.17	D. Irwin
Local government infrastructure plan – PFTI. Townsville City Council. (Superseded LGIP)	11.4.17	D. Irwin
Local government infrastructure plan – alignment with the long term financial plan. Townsville City Council. (Superseded LGIP)	11.4.17	D. Irwin
Local government infrastructure plan – SOW model user manual. Townsville City Council. (Superseded LGIP)	11.4.17	D. Irwin
LGIP projections and densities. EXCEL spreadsheet. Townsville City Council (Superseded LGIP)	11.4.17	D. Irwin

PIP water infrastructure planning summary of water supply strategies. DPM Water Pty Ltd report for Townsville City Council. (37386545) (Superseded LGIP)	2013	DPM Water Pty Ltd
PIP sewer infrastructure planning summary of sewer strategies. DPM Water Pty Ltd report for Townsville City Council (37386503) (Superseded LGIP)	Jan 2013	DPM Water Pty Ltd
Townsville City Council road network planning report . Townsville City Council (78587969).	Nov 2014	B. Bailey
Townsville City Council report for footpath and cycleway network for priority infrastructure plans. Townsville City Council (37384255).	Jan 2013	B. Bailey
Townsville City Council parks planning report (94191754)	14.3.17	D. Irwin

4.6 Definitions

This local government infrastructure plan has been prepared as part of a planning scheme compliant with the Queensland Planning Provisions version 3.0, 17 February 2013. As such, terms defined elsewhere in the planning scheme are applicable here. In addition, the following terms also apply.

Table 4.6.1 - Zoning code abbreviations

Note – these are not a complete list, but are relevant to the tables elsewhere in this local government infrastructure plan and relate to zones described in the planning scheme.

Abbreviation	Zoning
CF	Community Facilities
CR	Character Residential
DC	District Centre
EC	Emerging Communities
HDR	High Density Residential
HII	High Impact Industry
LC	Local Centre
LDR	Low Density Residential
LII	Low Impact Industry
MC	Major Centre
MDR	Medium Density Residential
MII	Medium Impact Industry
MU	Mixed Use
NC	Neighbourhood Centre
OS	Open Space
PC	Principal Centre
RR	Rural Residential
RUR	Rural
SC	Specialised Centre
SR	Sport and Recreation

Table 4.6.2 - Precinct code abbreviations

Note - these are not a complete list, but are relevant to the tables elsewhere in this local government infrastructure plan and relate to precincts described in the planning scheme, or growth model precincts identified in the extrinsic material.

Abbreviation	Precinct
AC	Arcadia Central
ACC	Aitkenvale Centre Core
ACF	Aitkenvale Centre Frame
AMC	Aitkenvale Major Centre
AMD	Aitkenvale Medium Density
AV	Aitkenvale Village
BBCG	Balgol Beach Golf Course
BRM	Bayswater Road Medical - Mixed use precinct
C	Cungulla
CA	Civic Administration
CBDG	Sturt Street Gateway
CTR	Charters Towers Road Business - Mixed Use precinct
D	Domain Central (growth model precinct)
FRM	Fulham Road Medical (growth model precinct)
FSR	Flinders Street Retail
H	Horticulture
HPMC	Hyde Park Major Centre

Abbreviation	Precinct
HPMD	Hyde Park Medium Density
J	Jensen
KR	Kings Road
KT	Kirwan Traders
MCF1	Major Centre Fringe 1 (growth model precinct)
MCF2	Major Center Fringe 2 (growth model precinct)
MCF3	Major Center Fringe 3 (growth model precinct)
MCNS	Major Center North Shore (growth model precinct)
MH	Mater Hospital (growth model precinct)
MHF1	Mater Hospital Frame 1 (growth model precinct)
MHF2	Mater Hospital Frame 2 (growth model precinct)
NBG	Nelly Bay Gateway
NBT	Nelly Bay Tourist
NWV	North Ward Villages
PB	Picnic Bay
PS	Palmer Street
R	Riverway
RRRC	Ross River Road Corridor (growth model precinct)
RRRD	Rural Residential Ross Dam (growth model precinct)
S	The Strand
STRD	South Townsville Rail yards and Dean Park
TCMC	Thuringowa Central Major Centre
TSDA	Townsville State Development Area (model precinct)
WS	Wotton Street

Table 4.6.3 - Sub-precinct code abbreviations

Note - these are not a complete list, but are relevant to the tables elsewhere in this local government infrastructure plan and relate to sub-precincts described in the planning scheme, or growth model precincts identified in the extrinsic material.

Abbreviation	Sub-precinct
BP	Buffer (TSDA) – (growth model precinct)
ECP	Environmental Conservation (TSDA) – (growth model precinct)
ECOP	Ecological Corridor & Offsets (TSDA) – (growth model precinct)
HIIP	High Impact Industry (TSDA) – (growth model precinct)
LMI	Low Medium Impact Industry (TSDA) – (growth model precinct)
TCS	Thuringowa Centre Support
ID	Thuringowa Drive
